Claim 17

The Examiner groups claim 17 together with claim 26, even though their limitations are different. Applicant respectfully submits that this is improper.

The claim recites a TDMA system. The claim further recites allocating real-time data and non-real-time data in variable proportions to a time frame.

In rejecting this claim, the Examiner reads a frame on multiple frames. Applicant respectfully submits that this is also improper.

Applicant accordingly respectfully submits that the Examiner has failed to make a *prima facie* case of obviousness against claim 17.

Please charge any fees other than the issue fee to deposit account 14-1270. Please credit any overpayments to the same account.

Applicant respectfully submits that he has addressed each issue raised by the Examiner — except for any that were skipped as moot — and that the application is accordingly in condition for allowance. Allowance is therefore respectfully requested.
